

SHRESHTH P SHETTY

+1 (214) 819-7958 | Email: sshetty8@illinois.edu | www.linkedin.com/in/shreshth-shetty-31b19622

EDUCATION

University of Illinois at Urbana-Champaign - Freshman
Engineering Undeclared

Expected May 2029
GPA: 3.76/4.00

Related Coursework:

Calculus III | Introduction to Electronics | Introduction to Computing

TECHNICAL SKILLS

Programming Languages: Java, C++, Python, Assembly level code, Arduino, Flutter

Framework/tools: Figma, LTSpice

Spoken Languages: English, Hindi and Marathi

WORK EXPERIENCE

Independent Research – Literature Review

Student Researcher

Mumbai, India
June 2024 – August 2024

- Conducted an independent literature review on **low-cost EMG signal acquisition circuitry**.
- Analyzed **myographic signal hardware design**, applied **LTSpice simulations**, and **evaluated component feasibility** by reading from component sourcing resources like Digikey
- Produced a **comprehensive review paper** on accessible EMG systems for **robotics and prosthetics applications**, presenting a **potentially reduced cost of 35\$** for an EMG device.

KADO

UI/UX Intern

Virtual
June 2024 – July 2024

- Conducted **competitor analysis** of digital business card platforms and designed **user-flow wireframes in Figma** to improve usability and feature clarity
- Built and presented **basic Flutter UI components** for redesigned profile screens, applying reusable widgets and design guidelines in collaboration with the product team.

PROJECT HIGHLIGHTS:

Applause Meter:

December 2025

- Developed a **fully analog clap-intensity detection system** using modular signal-processing stages, collaborating with teammates to integrate, debug, and ensure compatibility across circuit modules.
- **Designed and tuned the timed reaction circuit** using various components taught to us throughout the semester to produce stable, fixed-duration outputs and prevent retriggering from impulsive signals.

Autonomous Vehicle Prototype:

December 2023

- Developed a **self-navigating car** using **Arduino programming, MATLAB tracking, and custom electronic circuitry** for obstacle detection and autonomous movement.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

School Editor - Smt Sulochanadevi Singhanian School, Thane, India.

June 2022 - May 2023

- Authored and edited articles for the school magazine, ensuring high-quality and well researched content.
- Organized and supervised cultural events, writing scripts, coordinating teams and managing event logistics.

Volunteering (Community Service) – TribesForGood

Jan 2024 - March 2024

- Promoted STEM education within socially impoverished communities by teaching and conducting tours of the Nehru Planetarium, Mumbai, raised donations of up to Rs 18,000 through crowdfunding to help set up computer labs for unprivileged communities across Mumbai.
